*The driver may already be updated to a newer version prior to packaging. If your installation screen does not match the content of this manual, please refer to your software screen after installation.

I. General Information

1. Overview

Welcome to the world of tablet and digital pen! You are able to discover how easy to control your Personal computer by using a wireless digital pen to instead of a mouse:

The function of the digital pen is able to draw a line very thin, thick, light or dark (called pressure Sensitivity). You also can write, sign, annotate documents, and draw, sketch or paint as easily as you Would on normal paper and simulate the functions like pencil, mark pen, brush, or watercolor pen by Using the commercial software packages such as Adobe® Photoshop[™], Corel® Painter and Paint Shop. If MSN Messenger 8.5 or newer is installed, you create and send digital handwritings and hand drawn pictures, making communication much more fun and entertaining.

Note: If you cannot enable the handwriting mode in MSN Messenger, download the relevant handwriting Component from Microsoft's website.

2. Pen Tablet Functions

After installing the device driver, your pen tablet features has the following functions:

- 1. Direct pointing You can move the cursor to any location on the screen by hovering the digital pen tip over the tablet's surface.
- 2. Three-buttons mouse commands Your pen tablet provides all functions of a three-buttons' mouse by using its pen tip and two buttons.
- **3.** Pen scrolling You can scroll documents and Web pages by pressing the middle button of the digital pen over the tablet's working area.
- **4.** Pressure sensitivity This feature allows you to emulate various brushes and pencils and you can

press down the pen tip harder, lighter, stronger or thicker, and subtle pencil lines you will receive.

3. System Requirements

Windows XP/Vista/Windows 7/Windows 8 USB port DVD-ROM drive

4. Installing the Driver Software on Windows

For Microsoft Windows XP, Vista and Windows 7 Windows 8 operating systems:

- 1. Insert the Driver CD into the CD-ROM drive, and wait for the main installation screen to appear.
- 2. The main installation screen should appear automatically, or you can manually start the installation by opening[My Computer] ▶[CD/DVD Rom] ▶ then click on the [Setup]program.
- **3.** When installing the driver, follow the installation instructions on screen and press the "Enter" key.

After the installation has completed, reboot the computer.

5. Hardware Installation

Connecting a tablet with USB interface into the PC after the driver installation is finished and you have restarted Window:

To connect a pen tablet into the PC, you will see a small tablet icon (^[]) appears in the system tray, which is normally at the lower right corner of the screen.

6. Verifying Hardware and Driver Functions

6.1 Follow the steps to verify if the wired tablet is installed properly:

The blue LED light on the tablet is the main indicator for hardware operation and depending on your pen tablet model, it may be located at a different place that shown in the above diagram. This LED normally stays off, and will only turn on or off in response to various conditions. Watch the state of the LED on the tablet as you go through these test steps:

- 1. Press down the "power on" button at the top of the pen, then the pen will be turned on and activated. If you want to quit your work, press it again to turn it off.
- 2. As soon as the pen tablet itself activates, the LED will be lit briefly, and will then go and stay off again.
- **3.** When the tablet detects the presence of the digital pen or mouse, the LED will be blink slowly. This happens either when pen tip is hovering or placing within the working area which above the tablet.
- 4. When you press a button on the pen barrel, or click on a mouse button, the LED will be lit up.
- 5. Hovering and moving the pen or the mouse in the working area will cause the cursor on the screen to move accordingly.

Note: After the tablet's device driver has been properly installed, a small tablet icon (\square) will appear in the system tray, which is normally at the lower right corner of the screen.

7. Usage Tips

- 7.1 Please make sure you have turned power on of the digital pen by holding down power switch before using.
- 7.2 It was recommended to turn the power off when you are about to quit your work.
- 7.3 Double tapping

When you double tap with the digital pen (equivalent to a double click with a mouse), try to keep the pen tip away from the tablet's surface, or at least try to lift the pen tip as fast as possible before the second tap.

7.4 Storing the digital pen

To store the pen, make sure the pen tip does not touch anything, and especially do not let the pen stand in a cup or penholder with the tip down. Even though the possibility is low, constantly put stress on the pen tip might damage precise configuration of the pen. Place the pen in a penholder, or turn the pen tip pointing upward or horizontally with the pen tip free of any pressure by other objects.

- 7.5 Scrolling function of digital pen The digital pen has the same function of the normal mouse for scrolling pages. Press the first button of the digital pen (same function as mouse' s middle click) over the tablet' s working area.
- 7.6 Using a pen without an ordinary mouse You may install the digital pen, digital mouse, and normal mouse in your computer at the same time and you can also remove them to a different computer as well. However, only one device is able to work at a time.

*. Do not use more than two devices at the same time in case the screen cursor is jittering or not moving.

II. Pen tablet configuration

You may configure the pen tablet by modifying the functions of the pen tip and the two barrel buttons, tap [Start] > [Settings] > [Control Panel], and double-tap the [Tablet Setting^{III}] icon, or tap on the tablet icon (^{IIII}) in the system tray, usually located at the lower right corner of the screen. You may also adjust the pressure sensitivity of the digital pen by determining the scope of the tablet' s working area, or (re-) program the hot-cells of your pen tablet by modifying device driver.

1. The Info Tab

The Info tab displays the version number of the driver and Tablet PC function.

(1) Show Icon in System Tray

You can choose it if you want to show the tablet icon (\square) in the system tray.

(2) Support Tablet PC Feature

You can select the Tablet PC function of pressure sensitive by tick the box of Support Tablet PC Feature.

- After the tablet driver is installed in Windows, the Tablet PC function setting will support pressure in MS Journal, OneNote (2003 007), etc.
- If the Tablet PC setting is disabled, most of the art software's pen pressure (Photoshop, Illustrator, Corel Painter) are still working, but the pen pressure will not be available in MS Journal, OneNote (2003 2007), etc.

2. The Button Tab

express Keys	Scope	Hot Cells	Pressure
Info	Monito	Setting	Button
		Button Comma Button Name Pen Tip Mouse Comma Left Click	nd • nd
	-		Default

2.1 Button Name

You may re-program the functions of the pen tip and the two-barrel buttons by selecting the button name from the

drop down menu and assign a command of a traditional three-button mouse to it. According to the mouse function, you can select no action, left click, left double click, middle click, middle double click, right click, or right double click.

2.2 Double Click Time

Move the Speed Slider toward "Slow" if you want more time in double tapping with the Pen Tip or opposite if you move the Speed Slider toward "Fast". This setting is the same as Double-click Speed on the page displayed by selecting Start ► Control Panel ► Mouse ► Buttons. Changing the speed in one place or changing the other in the meanwhile.

2.3 Default

Tap on the Default button to recovery from all the manufacture settings.

3. Express Keys define page

Express Keys :

For the models with express keys, you can change the express key settings from the Express Keys Configuration Page.

3.1 Default

Resume the Express Keys to the default settings.

3.2 Re-define Express keys

Select "Common", "Mouse", "Multimedia", "Other", "Run", "Internet" and "Hot Key" tabs to re-define the settings.

3.3 Common

Express key name

Rename the Express Key.

7.2 Clear

Tap on the **Clear button** to clean the space up in the Pressure Test area.

7.3 Click Sensitivity

By default setting, tapping with the pen tip is equivalent to a left click of a mouse. Move the slider in the sensitivity bar to adjust the response of the pen tip. Light means when presses the pen tip that will be reacted very quickly with a slight power, but the heavy function is opposite.

III Storing the Digital pen and changing the Pen Battery & Tip

Storing the Digital pen properly

To store the Digital pen, make sure that the tip does not touch anything, especially, do not let the pen stand in a cup or penholder with the tip down. Pressure applied to the pen tip might damage the precise configuration of the pen, it is recommended to place the pen in a pen holder or store it with the pen tip pointing upward, or place it horizontally with the pen tip free of any other objects.

Note: It's recommended to turn the power off by pressing the power button at top of the pen to save battery. See below about how to change batteries.

Fig. (A) Unscrew the pen,

Fig. (B) Put an AAA battery into the pen-holder, + pole towards to pen tip end.

Hold down the power on/off button, then the pen works.

Changing the wireless stylus pen tip

A: Pull out the pen tip from Digital pen by using a Pen Clip that contained inside the pen holder. Normal Pen Clip

B: Push the pen tip into the digital pen, Make sure fit it up to the end properly.

Gently unscrew the pen holder in a counterclockwise direction. you" Il see one pen tip replacement tool & 4 spare pen tips inside.

The pen tip replacement tool 4 pen tips

Cautions

- Do not put the tablet on a metal surface, such as iron or aluminum alloys.
- Due to a CRT monitor's electromagnetic radiation, do not use the drawing tablet too close to a CRT monitor.
- Please do not stack tablets while battery has been installed in compartment; otherwise, the tablet cannot enter sleep mode, and battery power will be consumed very fast. Taking out battery is recommended in this case.
