NewVission

IWB Software Installation Manual E-100/200

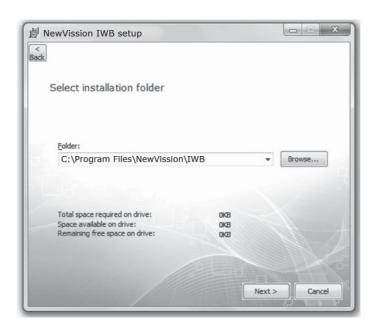

NewVission

Installation

- **Step 1:** Browse the NewVission IWB CD, either right click and Autorun or browse the CD and run E-100/200 Master Installer XXXX file.
- Step 2: Once the installation begins you will see the following screen, click "Next" to proceed.
- Step 3: Click "Typical" installation

Step 4: Please enter the location on the system where the E-100/200 IWB should be installed, by default it is installed in the Program Files/ NewVission Interactive folder.

Step 5: Click "Install" to start the installation.

Step 6: After NewVission IWB installation is completed, you'll immediately see the screen given below, click "Next" to begin installing NewVission IWB prerequisites.

Step 7: Check "I accept ..." the terms in license agreement and click "Next".

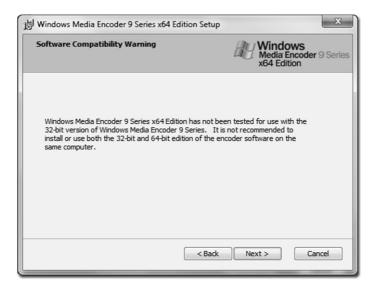

Step 8: After finishing installation of WM Encoder for 32bit Windows OS, it will automatically start installing WM Encoder for 64bit Windows OS (It will happen only if Windows 7 64bit is installed in pc or laptop), Click "Next" to begin installation

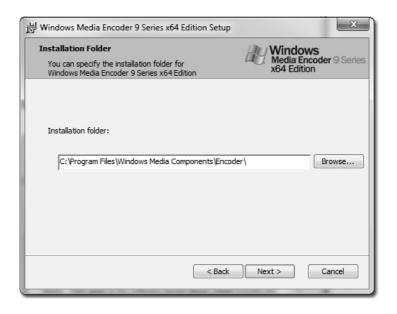

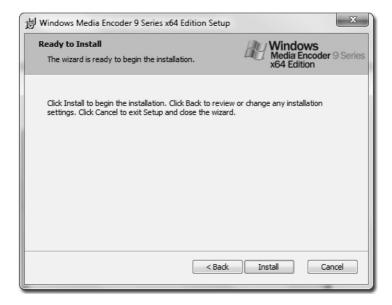

Step9: On seeing the screen below, click "Next" to proceed.

Step10: Follow the same procedure as earlier.

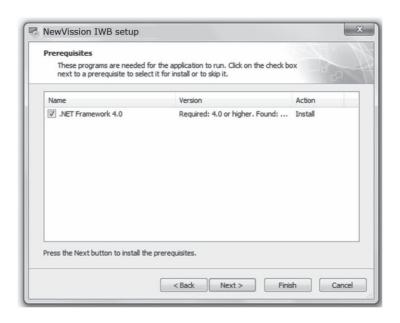

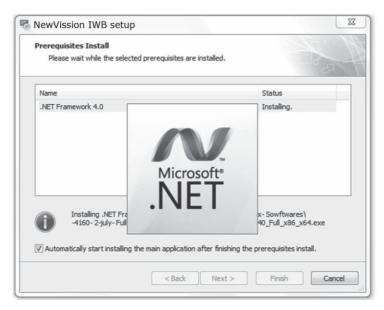

After WM Encoder gets installed, Flash player will be installed automatically.

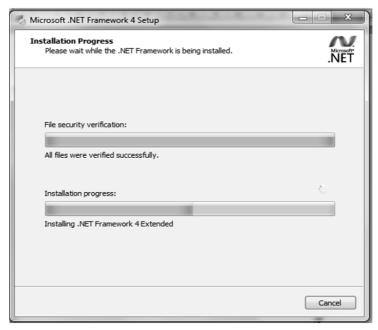

Step 12: Check on the ".NET" Check box and click "Next".

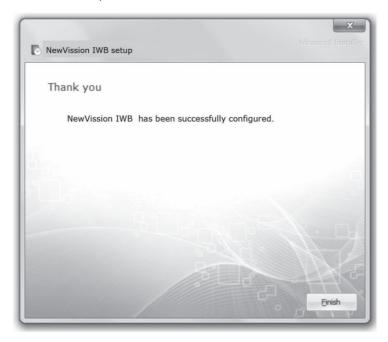

Once the following screen appears it may take some time, approx. 3-5 min. depending on the processor speed.

Click "Finish" to complete Installation

And click "Yes" to reboot the PC.

E-100/200 Operation

When no calibration is loaded, the E-100/200 window appears as shown below:

or else shows all the stored calibrations:

1 Calibration Button

No Calibration Loaded (Red & Blue +)

E-100 Calibrated (Blue +)

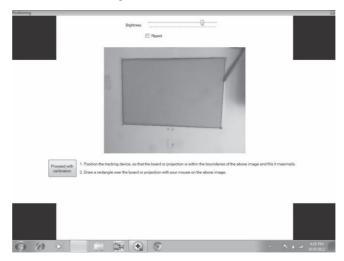

How to calibrate E-100/200?

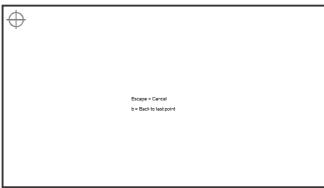

- 1. Click on the Calibration Button.
- 2. Click on the "Yes" button or press Enter, it will load the calibration helping page as shown.

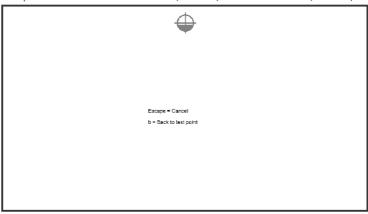

3. Try to cover the projection area closely by dragging your mouse on the display. You can also adjust the corners of the area of interest by clicking on them and dragging. After this, E-100/200 will only track inside this quadrilateral & rest all areas will be ignored. This is especially useful if there is some source of ambient light disturbance around the canvas.

4. Now place the E-pen on the center of the calibration circle till it gets filled with red color & turns green.

5. Repeat it for all the 9 calibration circle, in E-100/200 calibration circle, in E-100/200

6. Once done, please enter the name for the calibration and click "OK".

7. E-100/200 is now calibrated.

3. Settings

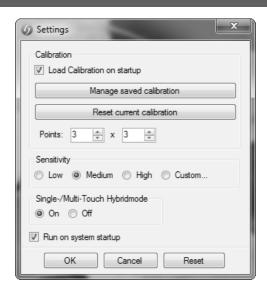

Settings Loads the setting menu

Tracking Monitor Shows the area which the E-100/200 device can see

Check Ambient Light Checks for any ambient light in and around projection area

Import Calibration Import calibration from another location

NewVission
